

Quick start instructions for use of NNPD

1. Download the zip folder NNPD
2. Copy the Folder on your computer
3. Ideally, have a dedicated computer & printer. Otherwise system crash occurs frequently.
4. Click to open the database
5. Click open, this opens the database
6. If your computer gives a message that the macros have been disabled, please enable macros for the program to work smoothly.
7. You have the option to enter intramural births, extramural births, still births, print discharge summary.
8. Fill all the information at the time of discharge wherever appropriate, yes/or no.
9. Fill status of breast feeding outcome & others
10. Click add the record to save
11. * Preview report – this is customized discharge summary for patient
12. Regularly back-up your data on a CD/DVD/External hard disk.

For support regarding this software contact: sdeorari@yahoo.com

- * Customization of database to your need/with hospital name and logo can be done by yourself or paying Rs. 1000/- on name of Mr. Sanjeev Negi. The customized programme will be couriered to you with CD Rom.
